

## SAN MINIATO EXPERIENCE

### Truffle in Tuscany

Via Covina, 44, 56028 San Miniato PI

# Truffle Experience

The forest is a "sacred" place for truffle hunters. While walking in the woods one must feel "guests" and not "masters", this is why before the start of the Truffle Experience we will do a small briefing!

During the pleasant walk in the woods with the truffle dogs, we will illustrate you all the various types of truffles present in Tuscany at different times of the year, their natural habitat, what to do to preserve it when they are extracted from the ground, the organoleptic qualities of the truffles, their cycle reproductive and - most importantly - how to recognize the difference between a "true" high quality truffle compared to "false" (flavoured) products.

We will tell you stories and myths behind the truffle world. Those stories narrate superheroes (and superdogs). For example, that time the largest white truffle in the world was found in San Miniato.

Further information:

- It is very important to communicate allergies/intolerances or special needs in advance.
- Any truffles found during the "hunt" are not included in the price (there is no obligation to purchase).
- Sportswear and comfortable clothing is suggested (in case of rain we have boots for guests).
- Children are more than welcome, they represent our future and therefore we are very proud to share our tradition with them and show them how important it is to preserve the natural habitat.

Minimum number of participants 5

Italian, English

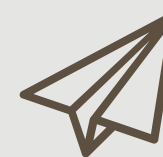

1,5h

All year round

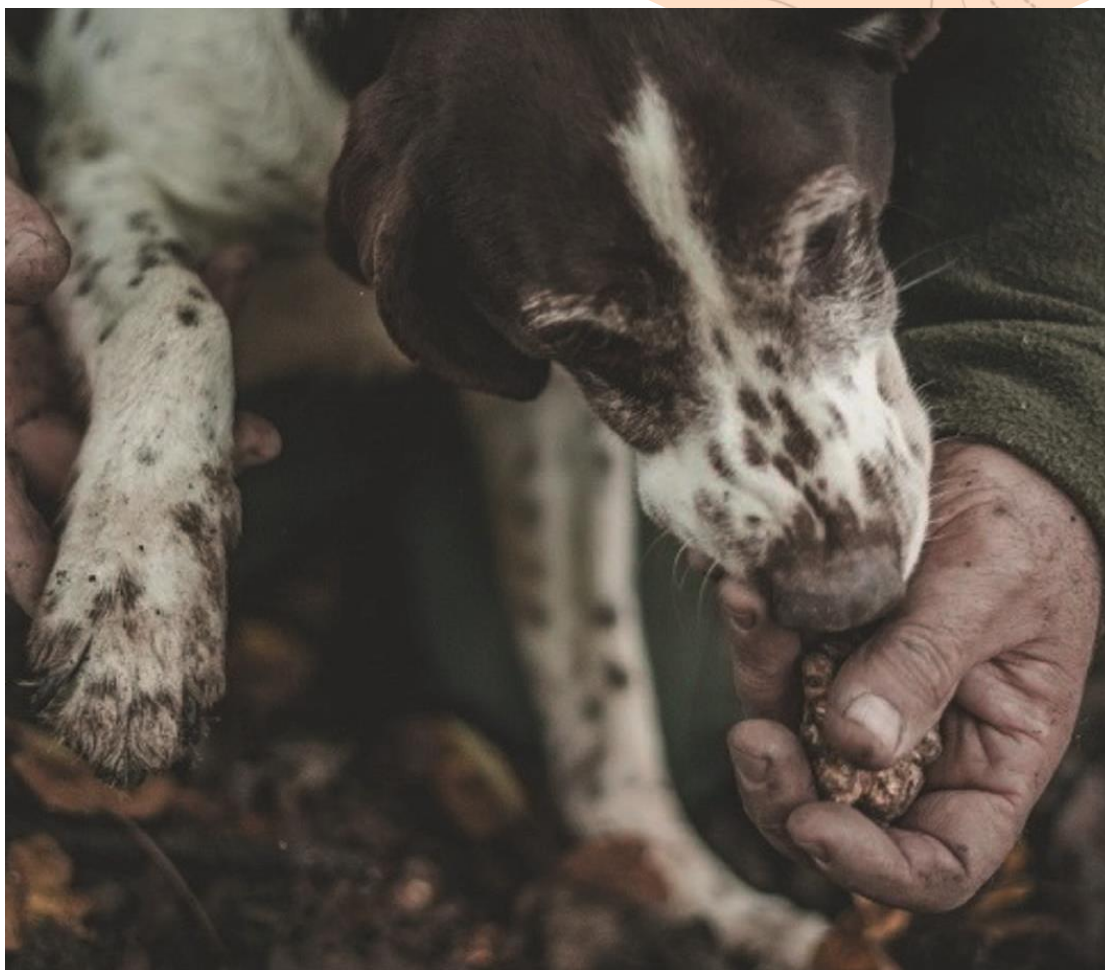

€250  
(€50 for every additional participant)

# Truffle and Home Lunch Experience

The forest is a "sacred" place for truffle hunters. While walking in the woods one must feel "guests" and not "masters", this is why before the start of the Truffle Experience we will do a small briefing!

During the pleasant walk in the woods with the truffle dogs, we will illustrate you all the various types of truffles present in Tuscany at different times of the year, their natural habitat, what to do to preserve it when they are extracted from the ground, the organoleptic qualities of the truffles, their cycle reproductive and - most importantly - how to recognize the difference between a "true" high quality truffle compared to "false" (flavoured) products.

We will tell you stories and myths behind the truffle world. Those stories narrate superheroes (and superdogs). For example, that time the largest white truffle in the world was found in San Miniato. At the end of the truffle hunt, you will have a lunch "by the truffle hunter's house", with a 4 courses menu entirely based on fresh truffles and excellent local wines pairing.

For large groups, lunch will be organized by one of the best restaurants in San Miniato which has always given us ample guarantees of the quality of products and services.

#### Further information:

- It is very important to communicate allergies/intolerances or special needs in advance.
- Any truffles found during the "hunt" are not included in the price (there is no obligation to purchase).
